

SPEECH PROCESSING IMPORTANT QUESTIONS

1. Finite State Transducer (FST)
 2. Phonological Rules And Transducers
 - I Insertion
 - English Flapping
 - Z Devoicing
 3. Place And Manner Of Articulation Of Consonants
 4. Minimum Edit Distance Algorithm, Worked Out Example
 5. Noisy Channel Model
 6. Spelling Correction Algorithm
 7. Neural Networks And Gaussian Models For Acoustic Probabilities
 8. Training Of Speech Recogniser
 9. Acoustic Processing Of Speech
 10. Viterbi Algorithm
 11. Advanced Methods For Decoding
 12. Forward Algorithm
 13. ASR Architecture
-
1. Application Of Speech Processing
 2. Vocal Organs
 3. Pronunciation Dictionary Lookup – Problems/ Concerns On Dictionary Lookup
 4. Weighted Automata
 5. Pronunciation Network For Words
